

# DAR-1001 Standalone Single Line Voice Logger

## Overview

The DAR-1001 phone recorder is a digital recording system that activates and deactivates on a single line normal analog telephone. Stand-alone, works independently without PC.

Built-in TF card for large storage capacity, high speed for data transmission, easy to expand and portable for carrying. Database management, recording files can be searched or read conveniently.

Recording includes complete voice recording, start time and date, call in/out numbers. Search by telephone number, length, in/outbound, time, date. Incoming caller ICON popup

## Features

1. The phone recorder is able to **record over 2300 hours of conversation** from a telephone recording. It can record for 1 year based on 5 days a week, when with the 16 GB memory Micro SD card. Yet no computer is required in order to hear your recorded conversation, as it also has a built in speaker and a head set connector for private playback.

2. With caller ID capability, this digital phone recorder can tell you the phone number of your incoming call along with the time, date, what numbers were dialed out and how long the conversation lasted (caller ID service required). This **DNR feature, or dial number recorder feature**, is very helpful to the home business
